Role of ICT & Educational Technology in Higher Education (Vol-5)

By Dr. Santosh Yadav, Dr. Monika Bishnoi

Ms. Sushila Devi

Rs. ₹ 595.00

Preface

As we enter an era of unprecedented technological innovation, the role of Information and Communication Technology (ICT) and educational technology in higher education has become even more central to the future of teaching, learning, and institutional operations. In this fifth volume of *Role of ICT & Educational Technology in Higher Education*, we build on the insights from previous editions to examine the newest trends, challenges, and opportunities brought about by the rapid advancement of technology in academia. This volume aims to explore how higher education institutions are navigating this ever-evolving landscape and what lies ahead as they continue to integrate technology into their core functions.

The core theme of Volume 05 centers on the emergence of new digital pedagogies driven by cutting-edge technologies such as artificial intelligence (AI), blockchain, and immersive environments. These technologies are not only reshaping the way content is delivered but also redefining the roles of educators and learners. AI, in particular, has made significant strides in the areas of adaptive learning, student assessment, and personalized education. In this volume, we explore how AI-driven systems are being used to customize learning experiences for students based on their individual needs, learning styles, and progress. Furthermore, we address the ethical implications and challenges of using AI in education, such as concerns about data privacy, bias, and the potential for over-reliance on automation in teaching and learning.

The integration of immersive technologies like virtual reality (VR) and augmented reality (AR) is another critical focus of this volume. These tools are providing students with more interactive and experiential learning opportunities, particularly in fields like medicine, engineering, and the sciences. VR and AR are enabling learners to engage with complex concepts in a hands-on way, making abstract ideas more tangible and fostering deeper understanding. Through case studies and research findings, this volume highlights how immersive technology is being incorporated into curricula, as well as the challenges associated with implementation, including cost, accessibility, and the need for specialized training for educators.

A significant topic in this volume is the role of ICT in promoting global collaboration and knowledge sharing in higher education. As institutions increasingly operate in a global context, ICT has become a vital tool for fostering cross-border partnerships, virtual exchange programs, and collaborative research initiatives. We examine how digital platforms are enabling students

and faculty to engage in international academic networks, facilitating the flow of ideas and innovations across geographical boundaries. These developments underscore the importance of preparing students for a globalized world, where cross-cultural communication and digital literacy are essential skills.

This volume also addresses the ongoing issue of digital equity and the digital divide, which remain significant barriers to the full realization of technology's potential in higher education. While technology has the power to democratize access to education, disparities in infrastructure, access to devices, and digital literacy continue to hinder progress in many regions. We discuss initiatives aimed at bridging these gaps and ensuring that all students, regardless of their socioeconomic background, can benefit from the advancements in educational technology.

As with previous volumes, this edition brings together contributions from educators, researchers, and thought leaders from around the world, offering diverse perspectives on the role of technology in shaping the future of higher education. We are deeply appreciative of the insights shared by our contributors, whose work continues to push the boundaries of what is possible in education through the use of technology.

We hope that this fifth volume of *Role of ICT & Educational Technology in Higher Education* serves as a valuable resource for educators, researchers, and policymakers who are committed to harnessing the power of technology to create more inclusive, effective, and innovative learning environments. As technology continues to evolve, we look forward to witnessing the transformative impact it will have on the next generation of learners and educators.

Contents

Editorial	5
1. The Ethical Life of AI in Education Shristi Singh & Dr. Ravi Kant	9
2. Impact of Artificial Intelligence on Education Dr. (P.D.) Jaishree Shukla	18
3. Roles and Responsibilities of MOOCS as National Coordinator Dr. (Prof.) Manju Gupta	26
4. Multimedia Mastery in Education: Integrating Audio and Video to Revolutionize Language and Literature Pedagogy Dr. Hirenkumar Dineshbhai Patel	35
5. Teaching with Artificial Intelligence Dr. Jitendra Kumar & Dr. Sharmila Srivastava	50
6. Impact of Smart Classrooms on Student Participation Dr. Monika Bishnoi	59
7. Enhancing the Quality of Education Through ICT Integration Dr. Nusrat Z Hirani	70
8. NEP 2020: A Paradigm Shift in the Indian Education System with a Focus on ICT in Education Dr. Ravneet Kaur	80
9. Impact of ICT on the Performance of Teaching and Learning Process among college students in the private institution Dr. (Mrs). P. Priya	91
10. Role of ICT in Enhancing Educational Outcomes: Innovations, Challenges, and Future Directions Hemant Kumar Binwal, Meenakshi Binwal, Dheerendra Kumar Binwal, Deepika Kholia Binwal	99

11. Impact of Virtual Learning, Eduset Network And Webinars on Higher Education	110
Kshipra Pandey Sowmya Kini Prabhu	
12. E-Learning Concept: Nature, Advantages, Limitations, and E-Learning Related Software	119
Mrs. Suganya.K	
13. Information and Communication Technology To Improve The Quality of Education	124
Ms. Bushra B Mr. Ajithkumar R	
14. E-learning and Virtual Classroom	134
Ms. Indhumathi N	
15. Imprtnace of Web Tools Like Zoom, Google Meet, E-Mali, Conferencing for E-Learners and Educators in Present Time	145
Ms. M. Anitha	
16. From Automation to Augmentation: AI's Evolution in Education	157
Pooja Chaudhary	
17. Unlocking Education for All: The Impact of MOOCs	164
Prabhat Kumar	
18. Information and Communication Technology Integration and its Effect on the Shadow Education Sector: A Path towards Educational Equity	177
Sachin Kumar Poonam Pandita Dr. Kiran	
19. Role of ICT in Online Teaching	188
Jayram	
20. Utility and Characteristics of Simulated Teaching in the field of Education	195
Dr. Achyut Kumar Yadav	
21. E-learning and Virtual Classroom in Higher Education	204
Mr. Shashi Shekhar
